

What is happening at the Greek borders?

For many years Turkey has been planning the destabilization of Greece (Hellas). This did not start with the Erdogan's presidency, but is an idea of the deep Turkish state. With the tolerance and blessing of the Turkish authorities, thousands of illegal immigrants cross daily into our country. Under the guidance of the EU and its legislative assistance, hundreds of NGOs, financed with millions of euros, either directly or indirectly, by Brussels, have created a parallel state in the Greek islands with their own laws and rules against the Greek law and the Constitution.

For many decades the Greek governments, loyal to globalization, could not do what the Greek people asked. Closed borders, safety and prosperity for the nation. Even government members were involved directly in NGOs with lots of money from illegal migration.

The uprising of the people in Lesvos and Chios played a definitive role. The government, after the failure to create new migrant centers and the resistance of the Greeks, who are chasing away suspicious NGO members, is at a tough spot. Forced by the people's demand and at the same time from Erdogan's new policy, they try to protect the borders, not with full success. It is not enough to close the borders in Evros. The land borders of Evros and the maritime borders of the islands stretch over several thousands of miles, and the Turkish traffickers are well aware of that.

The years-long lenient policy and the full opening of the borders by the leftist SYRIZA government, without any reaction by the other systemic parties, including the now ruling New Democracy, have created many problems that are now visible to everyone. Over 100.000 immigrants from non-war-torn countries (Pakistan, Bangladesh, Nigeria, Morocco, Algeria, Tunisia etc.) are trying to invade our country. Greece is Europe's frontier. The Greek people have risen and are now imposing their will. We Greeks know how to fight hard.
